

NMCPHC QUICK HITS

Medical Education and Training

The Navy and Marine Corps Public Health Center (NMCPHC) provides education and training programs that equip military and civilian healthcare personnel with tools, education, and programmatic materials required to deliver best-practice programs and interventions at the local command level. Many of the NMCPHC training programs and webinars offer continuing education credits upon completion. See below for a sampling of the NMCPHC education and training programs:

In-Person Training Offerings

[Defense Occupational and Environmental Health Readiness System- Industrial Hygiene \(DOEHS-IH\)](#)

DOEHS-IH courses provide industrial hygienist with the tools needed to create and maintain an IH program office, collect and manage occupational and environmental health risk data, and actively track biological, chemical, and physical health hazards.

[Food Safety Management](#)

The Navy Environmental Preventive Medicine Units (NEPMUs) provide food safety managers with knowledge of basic food microbiology, causes and prevention of food-borne illnesses, sanitary standards, health standards for food service personnel, food preparation and storage, and pest control.

[Health Promotion and Wellness \(HPW\) Trainings](#)

The HPW department supports the readiness of Sailors and Marines through training programs focusing on health promotion, tobacco cessation, the Sexual Health and Responsibility Program (SHARP), and the ShipShape Program.

[Shipboard Pest Management](#)

Shipboard Pest Management courses cover responsibilities for pest control aboard Naval vessels including preparation for pesticide treatment, pesticide and safety, respiratory control program, biology, survey and control of cockroaches, stored products pests, rodents, bedbugs, lice, flies, and mosquitoes.

Virtual Training Offerings

[Disease Surveillance Training](#)

The Preventive Medicine Program and Policy Support department provides monthly disease surveillance training sessions hosted on Defense Connect Online (DCO) for Disease Reporting System internet (DRSi) users. Training sessions cover topics such as outbreak investigation and reporting, contact investigations, and best practices for case findings.

[Health Promotion Webinars](#)

The HPW department hosts monthly webinars through DCO on a diverse range of topics. Subject matter experts highlight innovative and evidence-based programs that facilitate readiness and resilience, prevent illness and injury, hasten recovery, and promote lifelong healthy behaviors and lifestyles.
